Junior backend developer working with ASP.NET Core and applying Clean Architecture in personal projects. Comfortable with EF Core, repository & service patterns, middleware, filters, FluentValidation, JWT auth, Docker, and CI/CD. Currently in Itransition's competitive 22-week .NET training program alongside EPAM's .NET Development program.

EXPERIENCE

EPAM — .NET Development Program 2025 — Present
~4.5 months · ~20 hrs/week

- › Modern data processing tools for diverse database tasks
- › Design patterns and application architecture
- › ASP.NET framework and its practical use in web development

Itransition — .NET Training Program 2025 — Present
Competitive 22-week program, C# group

- › LCS code-golf (JS), SHA3-256 hash computation, ASP.NET Core API deployed on Render.com
- › Progressively harder backend tasks under review; completion leads to a job offer

Junior Backend Developer 2025 — Present
Self Practice & Personal Projects

- › REST APIs with ASP.NET Core Web API, Clean Architecture, EF Core, PostgreSQL/SQL Server
- › Middleware, filters, exception handling, DI, FluentValidation, JWT, logging, caching
- › CI/CD: GitHub Actions → Docker Hub → self-managed Ubuntu server, verified end-to-end
- › Unit + integration tests: xUnit, Moq, FluentAssertions; in-memory vs. SQLite test DBs

PDP University of Tashkent 2025 — Present
Bachelor of Computer Science (In Progress)
